The invention relates to an isolated nucleic acid detection reagent capable of detecting 1000 or more genes from brosophila. The inventuseful in developmental biology and in elucidating cell signalling cell-cell interactions in higher eukaryotes for the development of insecticides, therapeutics and pharmaceutical drugs. The invention discloses genomic DNA sequences (ABL16176-ABL30511), expressed DNA
                                                                                                                                                                                                                                                                    New isolated nucleic a
genes from Drosophila
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Drosophila; developmental biology; cell signalling; insecticide,

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Dermatophagoides, designated Der HMW-map protein, and its related nucleic acid. The Der HMW-map protein is useful for eliciting an immune response against Der HMW-map protein. The protein or a reagent comprising a non-proteinaceous epitope is useful for identifying an animal (e.g., dog, cat) susceptible to or having an allergic response to a mite. A therapeutic composition is useful for desensitising a host animal to an therapeutic composition is useful for desensitising a host animal to an

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         ABB64366 standard;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           reducing hypersensitivity responses to mite allergens, and as vaccines against mite allergen hypersensitivity. Sequences AAU96314-AAU96342 represent Der HMW-map polypeptides of the invention
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       allergic response to a mite. The DNA and protein can be used in the detection of anti-Der HMW-map antibodies in animal fluids, and inhibition of immunoglobulin (Ig)E or Der HMW-map protein activity associated with a disease. Antibodies that bind to Der HMW-map are useful for inhibiting binding of proteins to Ig3, to prevent immunocomplex formation, thus
                                                                                                                                                                                                                                                                                                                                                                                                                                  Venter JC,

                                                                                                                                                           The present invention relates to flea chitinase (CHT) proteins and their corresponding polynucleotides. Sequences of the invention are useful for protecting an animal from flea infestation or to reduce flea infestation in an animal susceptible to flea infestation. They are also used in gene therapy. The present sequence is flea chitinase protein
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         sequences (ABL01840-ABL16175) and the encoded proteins (ABS7737-AB372072). The sequence data for this patent did not form part of the printed specification, but was obtained in electronic format directly from WIPO at ftp.wipo.int/pub/published_pct_sequences
                                                                                                             Sequence 489 AA;
                                                                                                                                                                                                                                                                                                                                                                                         Novel isolated flea chitinase nucleic acid useful for protecting animal from flea infestation or to reduce flea infestation in an susceptible to flea infestation.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     AAE28202 standard; protein;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Sequence 460 AA;

                                                                                                                                                                                                The present invention relates to flea chitinase (CHT) proteins and their corresponding polynucleotides. Sequences of the invention are useful for protecting an animal from flea infestation or to reduce flea infestation in an animal susceptible to flea infestation. They are also used in gene therapy. The present sequence is flea mature chitinase protein

```

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

"Activation of a yeast pseudo DNA methyltransferase by deletio
single amino acid.";
J. Mol. Biol. 257:804-813(1996).
-!- FUNCTION: Does not have a cytosine-5 methyltransferase act
due to the insertion of a Ser residue between the Pro-Cys
found at the active site of C5 MTases. When this serine is
it becomes catalytically active and recognizes and methyla
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Eukaryota; Fungi; Ascomycota; Schizosaccharomycetes; Schizosaccharomycetales; Schizosaccharomycetaceae;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          "A type I peritrophic matrix protein from the malaria vector Anophelo gambiae binds to chitin. Cloning, expression, and characterization.", S. Biol. Chem. 273:17665-17670(1998).
-i- FUNCTION: Binds chitin but not cellulose. May be involved in the spatial organization of pm.
-i- TISSUB SPECIFICITY: Adult peritrophic membrane.
-i- DEVELOPMENTAL STACE: Expressed in adult but not larval guts,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Shen

CATALYTIC ACTIVITY: ATP + UTP + NH(3) = ADP + phosphate +
ENZYME REGULATION: Allosterically activated by GTP, when g
is the substrate. Inhibited by CTP (By similarity).

The substrate inhibited by CTP (By similarity).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            SUBUNIT: Homotetramer (By similarity).
SIMILARITY: Belongs to the CTP synthase family.
SIMILARITY: Contains 1 type-1 glutamine amidotransferase
SIMILARITY: Contains 1 RPE1 insert domain.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        (last) step.

-!- SUBCELLULAR LOCATION: Secreted.
-!- TISSUB SPECIFICITY: Expressed by the venom gland.
-!- SIMILARITY: Belongs to peptidase family S1. Snake venom subfamily.
